**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 08 November 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 17-22 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 17-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 17 claims "an outside surface in contact with tissue", and "said out side surface of the valve in contact with body fluids". Claim 18 claims "the outside surface of the wall is in contact with tissue". Both claim 17 and claim 18 positively claim a living tissue. The living matter of the present invention is not the result of human intervention; it is of nature, which has been held not patentable.

### ***Claim Objections***

Claim 18 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 18 claims, "the outside surface of the wall is non-irritating to and non-toxic to said tissue", which does

not further limit claim 17. In addition, claims 1-3 ("Depositing a biofilm;") were withdrawn in the previous office action as not being drawn to the elected invention.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laguette et al. (WO 98/08463) in view of Priscott (WO 97/14447). Laguette et al. discloses a voice prosthesis comprising a body and a valve, made from a silicone elastomer wherein the valve can have more antimicrobial properties than the rest of the prosthesis (p 6, lines 23-26), however Laguette et al. fails to disclose the use of triclosan as an organic antimicrobial coating. Priscott teaches the use of triclosan in the manufacture of medical devices, such as a voice prosthesis (Abstract), which, when incorporated into a polymer or biomaterial in the range of 0.5- about 5% by weight (p 7, lines 6-8), provides continuous, inherent control of the growth of a broad range of organisms (p 6, lines 20-24). It would have been obvious to one of ordinary skill in the art to combine the teaching of the use of triclosan in the manufacture of a voice prosthesis, as taught by Priscott, to a voice prosthesis comprising a body and a valve,

made from a silicone elastomer as per Laguette et al., in order to provide continuous, inherent control of the growth of a broad range of organisms.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
